### **Fitment Recommendations**

1. Always inspect your goods to ensure suitability of your needs.
2. Inspect product for any damage possibly incurred in transportation.
3. READ WARRANTY and INSTALLATION CONDITIONS IN FULL.

### **Installation checks we recommend to be performed.**

1. The fitter must replace, the engine oil, oil filter, thermostat and timing belts where applicable, failure to do so will void your warranty.
2. Radiators must be professionally serviced before installation of engine.
3. Inspect SUMP for any DENTS, and repair/replace if damaged.
4. Ensure water, and vacuum hoses are hooked up correctly.
5. Radiator Fan fluid coupling must be refilled/serviced or replaced as per manufacturer specifications.
6. Installation of an engine that is in *any way modified from standard*. Eg, Boost bleeders, ECU, Turbo, intercoolers etc, will void warranty.
7. Heater hoses are to be checked and replaced if damaged.
8. Heater hoses to be connected correctly or blanked off if disconnected.
9. Heater cores to be flushed out before being connected.
10. Oil Pressure to be checked on startup by installer.
11. Cooling system pressure test should be performed by installer.
12. Engines MUST be installed by qualified trades person.

### **THE FITTER MUST TAKE DUE CARE DURING INSTALLATION**
